

Amazon sales against Amazon settlements

One month of a synthetic amazon.de seller, in the documented report layouts

SHIPPED IN MARCH

€73,646

DEPOSITED

€45,133

AMAZON OWES

€144.46

The seller asks where the other €28,513 went, and whether Amazon paid everything it owes.

From March sales to the bank, EUR

	EUR

Cancelled, but charged	304-8965748-2541815	cancelled	19.90	+19.90
Charge with no order	305-3570548-3024662	—	44.90	+44.90

What the seller learns

- **Amazon's fees take 23.3% of sales:** commissions 11.8%, FBA fees 11.4%.
- **€9,744 is money on its way:** €7,529 settles in April, €2,215 sits in the reserve.
- **€144.46 is owed to the seller,** one claim per order above.
- **Two records need a person:** a customer charged for a cancelled order, and a sale with no order in the report.

Synthetic data with seven kinds of planted disagreement, all found with the right orders and amounts. The reconciliation code reads the three files only and was written by whoever planted them: this shows the method, not a blind test.
