

The AI's sales report, every figure annotated

The report an AI assistant wrote from a Shopify orders export, as the owner received it, with a note beside each of its 113 figures from the independent recount.

FIGURES IN THE REPORT

113

MATCH THE RECOUNT

27

DO NOT MATCH

8

CANNOT BE CHECKED

78

matches the recount

does not match

cannot be checked, with the reason

How to read it: each figure is highlighted where the report prints it, with a small number; the note of that number sits beside the same section. A figure the check recounted says what the export gives. A figure it could not recount says why, in one of four reasons:

- **46** not on the agreed menu
- **12** the agreed menu has it for the quarter, not per month
- **10** defined differently from the agreed menu
- **10** describes the cleaning; no count of it is published

"Cannot be checked" is not a pass. It is the list of figures an investor would be taking on the assistant's word, and each one is a question the owner can decide to ask.

Every status, recount and reason in this document is copied from the sealed verification document of the check (verification_report.md); the report is the sealed file the check was run over (sonnet-5-report.sealed.md, SHA-256 e8df0c58...d8d9d4). The data are synthetic: a generated EU shop in the real Shopify export format. The mistakes in the report are the assistant's own; nobody planted them.

Q1 2026 Sales Report

Source: orders_export.csv (Shopify), orders created 1 Jan – 31 Mar 2026, shop local time. All amounts in EUR, **including VAT, excluding shipping**. Script: analysis.py.

Key numbers

	Jan	Feb	Mar	Q1
Orders	3,217 ¹	2,615 ²	2,832 ³	8,664 ⁴
Gross sales	578,510.00 ⁵	496,406.00 ⁶	527,161.00 ⁷	1,602,077.00 ⁸
– Discounts	15,368.05 ⁹	12,932.70 ¹⁰	15,377.20 ¹¹	43,677.95 ¹²
– Refunds	34,003.77 ¹³	24,483.08 ¹⁴	24,515.22 ¹⁵	83,002.07 ¹⁶
Net sales	529,138.18 ¹⁷	458,990.22 ¹⁸	487,268.58 ¹⁹	1,475,396.98 ²⁰
Average order value	175.05 ²¹	184.88 ²²	180.71 ²³	179.87 ²⁴

- **Net sales** = gross sales (list price × quantity) – discounts – refunds. Net sales excluding VAT for Q1: **€1,230,049.35²⁵** (each order's own VAT share removed; VAT rates 16–19% by country).
- **Average order value** = order value after discounts, before refunds, excluding shipping (€1,558,399.05²⁶ / 8,664²⁷).

16 · 83,002.07 does not match

Refunds of goods on Q1 2026 orders
Recounted from the export: **83,507.42**. The report prints 505.35 less. Cause: the refund line of the assistant's code.

17 · 529,138.18 does not match

Net sales of the orders created in January 2026
Recounted from the export: **528,930.40**. The report prints 207.78 more. Cause: the refund line of the assistant's code.

18 · 458,990.22 does not match

Net sales of the orders created in February 2026
Recounted from the export: **458,841.03**. The report prints 149.19 more. Cause: the refund line of the assistant's code.

19 · 487,268.58 does not match

Net sales of the orders created in March 2026
Recounted from the export: **487,120.20**. The report prints 148.38 more. Cause: the refund line of the assistant's code.

20 · 1,475,396.98 does not match

Net sales in Q1 2026
Recounted from the export: **1,474,891.63**. The report prints 505.35 more. Cause: the refund line of the assistant's code.

Cannot be checked: the agreed menu has it for the quarter, not per month

1 3,217, **2** 2,615, **3** 2,832
The checked code computes the number of sale orders for the whole quarter only, not for one month.

Cannot be checked: the agreed menu has it for the quarter, not per month

5 578,510.00, **6** 496,406.00, **7** 527,161.00
The checked code computes gross sales for the whole quarter only, not for one month.

Cannot be checked: the agreed menu has it for the quarter, not per month

9 15,368.05, **10** 12,932.70, **11** 15,377.20
The checked code computes discounts for the whole quarter only, not for one month.

Cannot be checked: the agreed menu has it for the quarter, not per month

13 34,003.77, **14** 24,483.08, **15** 24,515.22

The checked code computes refunds for the whole quarter only, not for one month.

Cannot be checked: defined differently from the agreed menu

21 175.05, **22** 184.88, **23** 180.71

A different definition from the one the checked code computes: one month's order value after discounts and before refunds, over that month's orders; the checked code's average order value is net sales after refunds over orders, and for the whole quarter only.

Cannot be checked: defined differently from the agreed menu

24 179.87

A different definition from the one the checked code computes: order value after discounts and before refunds (1,558,399.05) over orders; the checked code's average order value is net sales after refunds over orders.

Cannot be checked: defined differently from the agreed menu

25 1,230,049.35

A different definition from the one the checked code computes: net sales with each order's VAT share taken out; the checked code computes sales including VAT, and the owner's ruling is that partial refunds carry no VAT split, so a figure without VAT cannot be recomputed exactly.

Refunds

- Refunded product value: € **83,002.07**²⁸ = **5.33%**²⁹ of order value (after discounts).
- 803**³⁰ of **8,664**³¹ orders (**9.27**³² %) had a full or partial refund (**364**³³ full, **439**³⁴ partial).
- Customers were also refunded € **1,815.05**³⁵ of shipping, so the refunded total in the export is € **84,817.12**³⁶.
- By month (refund value as % of order value): Jan **6.04%**³⁷, Feb **5.06%**³⁸, Mar **4.79%**³⁹.

Match the recount to the cent

- 32** 9.27 · Share of Q1 2026 orders with a full or partial refund, in p...

28 · 83,002.07 does not match

Refunded product value in Q1 2026, EUR
Recounted from the export: **83,507.42**. The report prints 505.35 less. Cause: the refund line of the assistant's code.

Cannot be checked: defined differently from the agreed menu

29 5.33%

A different definition from the one the checked code computes: refunds as a share of order value; the checked code's refund rate is the share of orders with a refund.

Cannot be checked: not on the agreed menu

33 364, **34** 439

The checked code does not compute this figure: it counts orders with a full or a partial refund together, and does not split them.

Cannot be checked: not on the agreed menu

35 1,815.05

The checked code does not compute this figure: it computes refunds of goods only, and no figure for shipping refunded.

Cannot be checked: defined differently from the agreed menu

36 84,817.12

A different definition from the one the checked code computes: the export's whole refunded amount, shipping included; the checked code computes refunds of goods only.

Cannot be checked: defined differently from the agreed menu

37 6.04%, **38** 5.06%, **39** 4.79%

A different definition from the one the checked code computes: one month's refunds as a share of its order value; the checked code's refund rate is the share of orders with a refund, and for the whole quarter only.

Discounts

- **€43,677.95⁴⁰** in total = **2.73⁴¹** % of gross sales. **1,910⁴²** orders (**22.0%⁴³**) used a code.
- By code: VIP20 **13,271.60⁴⁴** · WELCOME10 **10,519.70⁴⁵** · WINTER15 **7,919.25⁴⁶** · SPRING20 **6,437.40⁴⁷** · TENOFF **5,530.00⁴⁸**.

Match the recount to the cent

52 16.3%, **55** 15.6%, **58** 6.9%, **61** 6.7%, **64** 6.4%, **67** 5.8%, **70** 5.5%, **73** 5.4%, **76** 4.8%, **79** 4.3%

The checked code does not compute this figure: it computes each product's sales and the total, not the share of one in the other.

Cannot be checked: not on the agreed menu
80 77.7%

The checked code does not compute this figure: it computes each product's sales and the total, not the share of the ten largest.

Cannot be checked: not on the agreed menu
81 31.9%

The checked code does not compute this figure: it computes each product's sales and the total, not the share of the two jackets.

Repeat customers

- 5,957⁸² customers (identified by email) placed orders in Q1; 1,392⁸³ (23.4⁸⁴ %) ordered more than once, 551⁸⁵ of them three or more times.
- Repeat customers account for 45.3%⁸⁶ of orders.
- Limits: this covers Q1 only (earlier purchases are not in the export), and 318⁸⁷ orders without an email (mostly pop-up store cash sales) cannot be linked to a customer.

Match the recount to the cent

- 82 5,957 · Customers
- 83 1,392 · Customers
- 84 23.4 · Share of customers with two or more sale orders in Q1 2026,...

Cannot be checked: not on the agreed menu
85 551

The checked code does not compute this figure: it counts customers with two or more orders, not three or more.

Cannot be checked: not on the agreed menu
86 45.3%

The checked code does not compute this figure: it computes the share of customers who ordered again, not the share of orders they placed.

Cannot be checked: not on the agreed menu
87 318

The checked code does not compute this figure: it leaves orders without an email out of the customer count and publishes no count of them.

Sales by channel (net sales)

The checked code does not compute this figure: it computes net sales per sales channel, not a channel's share of them.

How the data was cleaned (please read before presenting)

The raw file has 9,659¹⁰² orders, but 9,159¹⁰³ were created in Q1 and only 8,664¹⁰⁴ are counted: - 1,068¹⁰⁵ orders were listed twice in the export (identical rows at the end of the file). Removed. Left in, sales would be overstated by roughly 11%¹⁰⁶. - **Excluded from Q1:** 84¹⁰⁷ internal orders (test/QA orders paid with a dummy gateway, and staff orders; € 15,472¹⁰⁸ of order value), 260¹⁰⁹ cancelled orders (voided, or cancelled and fully refunded, all unfulfilled; € 48,264.50¹¹⁰), and 151¹¹¹ unpaid orders (payment only authorized or pending; € 27,097.65¹¹²). - **Orders outside Q1** (29–31 Dec and 1–3 Apr, about 500¹¹³) are excluded. - **Refund timing:** the export has no refund date, so each refund is counted in the month the order was placed, not the month it was paid out. - Refunds on fully refunded orders include shipping. Only the product share reduces net sales. - Excluding cancelled orders makes the refund rate relate to orders that were actually fulfilled. Counting them would raise the refund rate.

Cannot be checked: not on the agreed menu
95 36,860.20, 98 14,371.70

The checked code does not compute this figure: it computes net sales of all draft orders together (Source shopify_draft_order), not split into phone and wholesale orders.

Match the recount to the cent
